

The **Luthier Special Interest Group (SIG)** is looking for a few new members.

Over the last year, the group has been meeting monthly from 7-9pm on a weekday evening at the shop of one of the group members in a centralized location off Hiawatha Ave in South MPLS. Meeting topics have been chosen in advance by the group, and activities generally included demonstrations of various topics related to electric and acoustic guitar design, construction, and finishing.

The skill level of group members ranges from beginners with no experience to experienced builders with many builds under their belt...and everything in between.

Specific meeting days can be reassessed, but please assume a 7pm start on a weekday evening.

If you are interested, and can meet monthly starting in June, please respond with answers to the following questions to Mike Nesnidal at mness4@yahoo.com.

Skill level:

- Beginner (not completed a build)
- Intermediate (partial build / failed build)
- Advanced (completed at least one successful build)
- Yoda (completed many builds and/or conducted some level of teaching)

Motivation:

- Just kicking the tires – might start my first build
- Interested in guidance for specific steps or a complete build
- Not looking for specific help, but would like to talk about luthier topics in general
- Interested in using my depth of understanding to helping others

Thank you!
Mike Nesnidal
